SUMMARY

Recent Computer Science graduate with hands-on experience in Python backend development, QA testing, and web application development. Skilled in Flask, Django, MySQL, APIs, and software testing. Built real-world applications involving workflow automation, authentication, and database management. Seeking backend/software engineering opportunities.

SKILLS

Frontend	: Html, CSS, JavaScript
Backend	: Python, Flask, Django
Database	: MySQL
Libraries/Tools	: NumPy, Pandas, Matplotlib
Testing	: Manual Testing, Regression Testing, Test Case Design, Bug Tracking
Version Control & Tools	: GitHub, VS code
Networking	: TCP/IP, DNS, Routing & Switching, OSI Model, LAN/WAN, Network Troubleshooting

EXPERIENCE

QA Intern | 6 Months | Salon Manager

Oct 2025 – May2026

- Tested and validated features of the Salon Manager System, including appointment booking, billing, customer records, and service workflows while identifying bugs, edge cases, and usability issues.
- Created test documentation, test cases, and maintained defect reports for issue tracking to ensure smooth application performance.
- Collaborated with developers to resolve issues, verify fixes, perform regression testing, and improve workflow efficiency by identifying functional gaps in the system.

PROJECTS

Milk Management System | Flask, MySQL, Python, JavaScript

- Developed a multi-role web application (Admin, Supplier, Provider) using Flask and MySQL to manage milk collection, provider onboarding, dynamic pricing, and automated reporting workflows.
- Implemented secure authentication using OTP verification, session management, Flask-Bcrypt password hashing, and role-based access control for secure user management.
- Built AJAX-based APIs for live rate calculation, integrated email notifications using Flask-Mail, and generated PDF invoices using ReportLab to improve operational efficiency.

Timesheet & Task Management System | Django, Python, MySQL, JavaScript

- Developed a role-based employee management system using Django and MySQL for managing tasks, timesheets, leave requests, and employee profiles.
- Built secure authentication, task workflows, leave approval processes, validations, and reporting modules using Django's ORM and backend architecture.
- Integrated email notifications, deadline reminders, calendar scheduling, and responsive UI components to improve workflow automation and employee productivity tracking.

EDUCATION

M.J.R. College Of Engineering & Technology, Piler, Andhra Pradesh

B.Tech- Computer Science & Engineering - GPA: 76.57%

Sep 2022 - Apr 2025

M.J.R. College Of Engineering & Technology, Piler, Andhra Pradesh

Diploma- Electronics and communication Engineering - GPA: 67.38%

Jul 2019 - Mar 2022

TRAININGS CERTIFICATIONS

Full Stack Python, Skilldizer
Cisco Certificate on "Networks".

Apr 2025
Apr 2022
