SUMMARY

Computer Science graduate with hands-on experience in Python backend development, FastAPI, Flask, MySQL, REST API development, and AI-powered applications. Built projects involving RAG, embeddings, LangChain, and resume analysis, with practical exposure to web application development and software testing. Seeking entry-level Software Engineer / Python Developer opportunities to build scalable backend systems and AI-enabled applications.

SKILLS

Frontend	: HTML, CSS, JavaScript
Backend	: Python, Flask, FastAPI, REST APIs
Database	: MySQL
AI / LLM Concepts	: LangChain, RAG, Embeddings, Prompt Engineering, Vector Databases
Tools & Platforms	: Git, GitHub, Postman, Docker, Swagger, VS Code

EXPERIENCE

QA Intern | Tecon Solutions

Oct 2025 – May 2026

Project: Salon Manager

- Tested and validated features of the Salon Manager System, including appointment booking, billing, customer records, and service workflows while identifying bugs, edge cases, and usability issues.
- Created and executed test cases, maintained defect reports, and performed regression testing to ensure application quality and performance.
- Collaborated with developers to verify fixes, retest resolved issues, and identify workflow gaps to improve system reliability.

PROJECTS

AI Career Assistant | FastAPI, Python, MySQL, JavaScript, LangChain

- Built an AI-powered career guidance platform using FastAPI and MySQL to provide personalized career recommendations, skill assessments, and learning roadmaps.
- Integrated LangChain, RAG, embeddings, and vector search to develop a chatbot that answers career-related queries and analyzes user profiles.
- Developed backend features such as resume analysis, skill-gap identification, roadmap generation, authentication, API validation using Pydantic, and API documentation using Swagger to support career planning.

Timesheet & Task Management System | FastAPI, Python, MySQL, JavaScript

- Developed a role-based employee management system to manage tasks, timesheets, leave requests, employee profiles, and workflow tracking.
- Built REST APIs and backend modules for authentication, role-based access control, leave approval workflows, validations, and reporting, while containerizing the FastAPI application using Docker for simplified setup and consistent execution.
- Integrated an AI-powered employee assistant using RAG, embeddings, and document retrieval to answer employee queries from company policies and internal documents.

EDUCATION

M.J.R. College Of Engineering & Technology, Piler, Andhra Pradesh

B.Tech- Computer Science & Engineering - Jntu Anantapur

Sep 2022 - Apr 2025

M.J.R. College Of Engineering & Technology, Piler, Andhra Pradesh

Diploma- Electronics and communication Engineering

Jul 2019 - Mar 2022

TRAININGS CERTIFICATIONS

Full Stack Python, Skilldizer
Cisco Certificate on “Networks”.

Apr 2025
Apr 2022
